ARCHITECTURAL CLADDING

TRANSFORMING
BUILDINGS
FOR THE FUTURE

PROJECT DETAILS

This two-storey office and warehouse complex in South Manchester is benefiting from a building envelope transformation.

The finished building incorporates new silver metallic and anthracite grey ALUCOBOND® cladding with tinted glass windows, hardwood cedar panelling and LED profile signage and lighting.

The rainscreen cladding gives the building a modern look that will give a positive, lasting first impression.

ORIGINAL BUILDING

LOCATION:
South Manchester

SYSTEM:
Through Fix/Hung

MATERIALS:
ALUCOBOND® PLUS
Cedar

COLOURS:
Silver Metallic
Anthracite Grey

SIGNAGE:
LED Profile Lighting
& 3D Signage

PROJECT DETAILS

MG Safety is a well-established distributor of PPE and industrial workwear products based in Bingham, Nottinghamshire.

They approached us to modernise their office and warehousing facility, which was looking tired and outdated.

Using ALUCOBOND® PLUS with Silver Metallic finish, we gave the entire building a full rainscreen cladding envelope.

LOCATION:
Nottinghamshire

SYSTEM:
Through Fix

MATERIALS:
ALUCOBOND® PLUS

COLOURS:
Silver Metallic

SIGNAGE:
Illuminated 3D Logo /
Illuminated Freestanding
